

ASTRA TECH INVITES YOU TO

Astra Tech EAO 2006 Gold Sponsor Course

A Good Morning with Astra Tech

Zürich, Switzerland, October 5, 2006

Developed with a biological
and biomechanical approach.

 **ASTRATECH
DENTAL**

We take it personally

Every patient is an individual and a fellow human being. Sounds obvious, doesn't it? This point of view governs everything we do at Astra Tech. We never forget that the end user might be a family member, a close friend or even ourselves. We are all potential implant patients. That's why our business is personal.

Our job, together with you, is not just about replacing one or several lost teeth, it is also about bringing back the joy and quality of life which has been lost due to edentulism. This is a huge responsibility, which we take very seriously. At the same time, Astra Tech must be competitive, invest in advanced research and development, and generate a profit. We also have to fulfill the legal requirements regarding safety and quality of medical devices.

In addition, we have chosen additional requirements when it comes to clinical studies and documentation of our products and processes. Why do we do it? The answer is simple: We don't believe in shortcuts. It feels good to know that what we do in our daily work contributes to increased joy and quality of life for a large number of fellow human beings today, tomorrow and beyond.

Welcome to A Good Morning with Astra Tech!

Find out more about how you and your patients can benefit from our approach to implant dentistry. The event will be held in a new dynamic format – a morning program. The program will consist of short lectures, dynamic discussions, great entertainment, interesting interviews and pleasant surprises. We have invited a number of internationally renowned clinicians and scientists representing different fields of dental implantology to take part in this open and inspirational morning session.

Sincerely,

Björn Delin
Business Unit Director, Dental
Astra Tech AB, Sweden
